DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. READ ALL DIRECTIONS COMPLETELY BEFORE USE. For best results, follow directions for specific areas. Do not use this product in or on electrical equipment due to possibility of shock hazard. Avoid excessive wetting of carpet, draperies and furniture. Always test in an inconspicuous area prior to use as some natural and synthetic fibers may be adversely affected by any liquid product.

FLEA CONTROL: The active ingredient in this concentrate is an insect growth regulator Nylar® IGR is similar to insect growth hormones that occur naturally in Insects and acts on the Immature life stages of the flea, preventing the adult flea from developing. Flea eggs deposited on treated areas will not develop into adult fleas. Flea larvae crawling onto treated surfaces will also not develop into adult fleas. Flea larvae crawling onto treated surfaces will also not develop into adult fleas. The unique properties of Nylar® IGR eliminates the flea population, when used as directed Nylar® IGR causes a gradual reduction and ultimate elimination of the flea population by breaking the reproductive cycle Nylar® IGR terminates the flea life cycle and stops the development of the immature stages of the flea for 210 days preventing them from reaching the biting adult stage. Existing adult fleas and flea pupae are not affected. If a high population of adult fleas are present, the use of an adulticide may be necessary for Immediate control. This concentrate may also be combined with a flea adulticide, such as Demize EC or Conquer® Nylar® IGR compliments the rapid activity of the adulticide by providing long term control of preadult fleas before they grow up to be biting adults.

Flea control on pels is important in the prevention of the introduction of adult fleas. Pets, their bedding and the areas they frequent should also be treated with EPA registered flea and tick control products, flea or flea and tick collar, pet powder, pet spray, pet dip, flea & tick pet shampoo, pet shampoo, as part of a complete flea control program in conjunction with this application to minimize the introduction of adult fleas.

Nylar® IGR can be used prior to the flea season. Application of this product in areas where pets and other animals are known to frequent and where previous infestations have been known to occur, will prevent the emergence of adult fleas and also control stages of fleas that don't resemble fleas. This early usage could reduce the need for conventional insecticides when used alone as directed Pretreatment of these areas before the fleas become biting and reproductive adults will aid in reducing developing populations.

INDOORS: Prior to treatment, carpets, draperies and upholstered furniture should be vacuumed thoroughly and the vacuum cleaner bag disposed of in an outdoor trash receptacle.

INSTRUCTIONS FOR USE: Nylar IGR is intended to be mixed with water and applied with spray equipment such as any low pressure sprayer typically used for indoor applications.

SPRAY PREPARATION: Prepare a diluted spray solution by adding 1.5 ounces per gallon of water. Partially fill the mixing container with water, add Nylar GR, agitate and fill to final volume. Do not allow spray mixture to stand overnight. Mix before each use.

IN CONJUNCTION WITH ADULTICIDE INSECTICIDE: This concentrate may be combined with an insecticide registered for adult control of fleas. The combination would provide immediate control of adult fleas and inhibit the development of the immature stages of the flea for 210 days. This application should conform to accepted use precautions and directions for both products. Use Nylar of IGR at application rates specified above.

GENERAL SURFACE APPLICATION: Apply diluted spray at the rate of 1 gallon per 1,500 square feet of surface area. Treat all areas which my harbor fleas, such as carpets, furniture, pet sleeping areas and throw rugs. Treat under cushions of upholstered furniture. Do not allow children or pets to contact treated surfaces until spray has dried. Repeat as necessary.

IN KENNELS AND DOG HOUSES: Treatment of these areas will control the development of preadult fleas from becoming biting and reproductive adult fleas. Using an adjustable hose-end sprayer, or tank type sprayer prepare a diluted spray solution by adding 1.5 ounces per gallon of water. Partially fill the sprayer with water, add required amount of concentrate in sprayer, agitate and fill to final volume. Agitate before each spray. Do not allow the spray mixture to stand overnight.

Apply at a rate of 1 gallon diluted solution per 1,500 square feet of surface area. Apply to building, resting areas, walls, floor, animal bedding and run areas. Remove animals before spraying and do not return animals to treated areas until spray has dried completely. Pets and their bedding should also be treated with EPA - registered flea and tick products such as flea and tick collar, pet powder, pet spray, pet dip, pet shampoo, flea shampoo or flea and tick shampoo in conjunction with this application as part of a complete flea control program to prevent the introduction of adult fleas.

FOR GERMAN, ASIAN AND BROWN BANDED COCKROACH CONTROL:

The active ingredient in this concentrate is Nylar® IGR, an insect growth regulator. Nylar® IGR is similar to growth hormones that occur naturally in insects and acts on the immature life stages of the cockroach preventing nymphal cockroaches from developing into adults. Shortly after application of this concentrate, cockroaches with twisted wings will begin to appear indicating that Nylar® IGR has taken effect - those cockroaches with twisted wings are unable to reproduce. The unique properties of Nylar IGR eliminate the cockroach population, when used as directed. One treatment works for 180 days against hatching cockroaches. If a high population of adult cockroaches are present, the use of an adulticide may be necessary for immediate control. Nylar® IGR causes a gradual reduction in the cockroach population by breaking the life cycle of the cockroach and preventing roaches from breeding. This concentrate may also be combined with a cockroach adulticide, such as Conquer®. This concentrate compliments the rapid activity of the adulticide by providing long term control of cockroach nymphs before they become breeding adults.

INDOORS:

INSTRUCTIONS FOR USE: Nylar [®] IGR is intended to be mixed with water and applied with spray equipment such as any low pressure sprayer typically used for indoor applications.

SPRAY PREPARATION: Prepare a diluted spray solution by adding 2 ounces per gallon of water. Partially fill the mixing container with water, add Nylar® IGR, agitate and fill to the final volume. Agitate before each spray. Do not allow spray mixture to stand overnight.

IN CONJUNCTION WITH AN ADULTICIDE INSECTICIDE: This concentrate may be combined with an insecticide registered for adult control of cockroaches. The combination would provide immediate control of adult cockroaches and inhibit the development of the immature stages of the cockroaches for 180 days. This application should conform to accepted use precautions and directions for both products. Use at application rates specified above.

GENERAL SURFACE APPLICATION: Brown Banded Cockroach, Asian Cockroach, German Cockroach, and Cricket: Apply diluted spray at the rate of 1 gallon per 1,000 square feet of surface area as a spot treatment, surface application and crack and crevice spray. Contact as many insects as possible with this spray in addition to thorough spraying of all parts of the room suspected of harboring these pests. Special attention should be paid to hiding places such as beneath sinks, behind and beneath stoves and refrigerators, cracks and crevices, around garbage cans, cabinets, along the outside of baseboards, door and window sills, door and window frames and floors, around and on drains, pipes, plumbing, behind bookcases, storage and other utility installation areas, infested furniture and the inside of cabinets and closets hitting insects with spray whenever possible. Repeat

NOTE: Not Labeled For Use in Food Areas of Food Handling Establishments.

SPOT AND CREVICE APPLICATIONS: Apply diluted spray solution using a pressurized spray system capable of delivering a pin-point or variable spray pattern. Crack and Crevice applications may be made directly to areas such as, but not limited to, crevices, baseboards, floors, ceilings, walls, expansion joints, molding, areas around water and sewer pipes, voids where pests can hide and similar areas. Spot treatments may also be made to areas including but not limited to storage areas, closets, around water pipes, doors and windows, behind and under refrigerators, cabinets, sinks, stoves and other equipment, shelves, drawers and similar areas.

WAREHOUSES: Nylar IGR may be applied as a general surface, fogger, spot or crack and crevice treatment in nonfood storage warehouses or in warehouses where stored food items are limited solely to either bottle or canned items, so that food contact is not anticipated. Apply to all areas that may harbor pests, including under and between nallets

STORAGE AND DISPOSAL

STORAGE: Store in a cool dry area away from heat or open flame.

DISPOSAL: Replace cap and discard container in trash. Do not incinerate or puncture.
